TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C#, Python, SQL (PostgreSQL, MS SQL Server), HTML/CSS
Frameworks: React, Next.js, NestJS, ASP.NET Core, Ionic Capacitor, Angular, Native Federation Microfrontends
Cloud & DevOps: AWS (CDK, ECS Fargate, Lambda, Cognito, RDS, Route53, Cloudfront), GitHub Actions, Docker
Developer Tools: Git, Redis, Prisma, Entity Framework Core
APIs & Integrations: Stripe, Gmail API, Microsoft Graph API, HubSpot, Salesforce, Asana
Data & Visualization: SQL, LINQ, Google Sheets API, Charting Libraries, GIS Data Handling

EXPERIENCE

Senior FullStack Engineer
DEVDEFY

Jan 2024 – Present
Hybrid

- Created frontend portals with Typescript NextJS, Vanilla React and standard React / Tanstack Query with Zod, Tailwind / Radix / Shadcn and MaterialUI
- Spearheaded backend architecture using Node.js and NestJS, building scalable APIs for multiple projects
- Mentored junior developers, reviewed critical code, and helped shape engineering best practices
- Provisioned full infrastructure on AWS using CDK, deploying services to ECS Fargate with CI/CD via GitHub Actions
- Acted as tech lead for new initiatives, responsible for bootstrapping codebases and driving technical direction
- Regularly participated in and led technical interviews to evaluate engineering candidates
- Collaborated with clients and stakeholders in early-stage meetings to define technical solutions

Senior Software Engineer
GTO (Geotech Overseas)

Mar 2025 – Sep 2025
Riyadh, Saudi Arabia

- Working on a modular microfrontend architecture using Angular Native federation to support scalable enterprise applications
- Maintaining and contributing to legacy Angular codebases, resolving bugs, and ensuring application stability
- Designing and implementing Web APIs and microservices using ASP.NET Core
- Implemented Redis-based caching strategies to efficiently serve GIS data

FullStack Developer
SOFTBIZ360

Dec 2022 – Dec 2023
Remote

- Migrated backend from EF6 to EF Core for multi-tenant support
- Designed dashboards and reports leveraging SQL Server's JSON capabilities
- Implemented listing pages and editing forms using React Router nested routes
- Integrated Google Sheets API and implemented dynamic schema imports
- Modernized frontend with TanStack Query for client/server state separation
- Worked with JWT Auth for row-level database authorization

FullStack Developer
MYMO

Jan 2021 – Dec 2023
Remote

- Developed reusable React hooks and components
- Integrated Stripe, Gmail API, Microsoft Graph API, HubSpot, Asana, Salesforce
- Managed Google Play Store and Apple App Store deployments
- Handled OAuth and auth provider contributions to ASP.NET repo
- Implemented push notifications using PubNub and Firebase
- Ported web app to mobile using Ionic Capacitor

FullStack Developer
BMS

Aug 2019 – Apr 2021
Remote

- Maintained admin and user portals
- Built reusable React components and hooks for paginated grid entities
- Implemented decoupled controllers and services in ASP.NET
- Wrote data aggregation and visualization queries
- Enabled KPI visualization through React graphs
